2.HPA card

High Power Amplifier

Product Description

HPA is a high output power fiber amplifier. It integrates erbium-doped fiber amplification technology and erbium-doped fiber amplification technology to perform two-stage amplification of the input signal, ensuring excellent noise specifications and efficient pump conversion efficiency. For high-power devices, we have designed a high-precision temperature control circuit, and optimized the heat dissipation in the internal structure of the frame and module to ensure the stability of the product and reliable operation for a long time.

Product Applications

- CATV network
- Other optical network

Building information in high speed, sharing technology for future

Product Features

- Support multi channels output
- Low noise
- Stable output
- Adjustable output power
- Good heat dissipation performance
